User notes for card set

The Monitoring and Evaluation Framework (MEF) supports schools on a journey of transformational change. It identifies nine principles and their associated aspects of practice which can enable the transformation and innovation of teaching and learning. The MEF is a prototype which will be revised and refined using feedback from user testing.

In this resource the MEF has been presented in a card set. Each card has a **MEF principle** printed on one side and an **aspect of practice** related to the MEF principle printed on the other side.

The cards can be used in a variety of ways by a range of people. School leadership teams, teachers, students, whānau, Boards of Trustees, and other stakeholders can use the cards to guide transformational change at their school or to embed and sustain transformational changes that have occurred.

Print and cut out the **Principles** and **Progress indicators** headings and cards and use them to unpack and discuss the MEF with different stakeholders – ‘participants’.

There are also blank cards for participants to add ideas, resources and questions as they are used.

*The terms ākonga and students are used interchangeably throughout this resource.

Suggestions for use

Thinking about the principles

Share the nine principle headings with participants and hand out some Post-It notes. Ask the participants to consider and discuss what a school might be doing to bring each principle to life. Participants need to create a set of indicator statements for each principle, recording their ideas on the Post-It notes. Give out the card set and ask the participants to check their own ideas against the aspects of practice recorded on the cards.

- + Did you identify similar aspects of practice to the cards?
- + Did the cards present additional ideas that you hadn't thought of?
- + Did you think of additional ideas that are not included on the cards?

Dot or tick vote on the additional indicator statements that you think matter the most in the context of your educational setting. Or choose to have all of them to add to the blank cards provided in the card set.

Random grouping

Shuffle the cards and spread them out with the aspects of practice face up. Ask the participants to group the cards into categories of their own choice.

- + Which aspects of practice do you think fit together and why?
- + Can you give each group of cards a title or theme?
- + Can the cards be grouped in more than one way?

Group by the principles

Shuffle the cards and spread them out with the aspects of practice face up. Give out the nine principle headings. Ask the participants to group the cards under the nine principles.

- + Which aspects of practice were difficult to place and why?
- + Could some aspects of practice fit under more than one principle?
- + Could you add more aspects of practice to the set?

Focus on one principle

Choose one principle and find all the cards belonging to that principle. Ask the participants to consider how well the school is progressing with each aspect of practice that relates to their chosen principle.

Participants could place the cards on a continuum marked by progress statements, for example: beginning; developing; extending; refining.

This activity can be carried out by different groups of people in your school to gain a range of perspectives. It can also be repeated with a focus on a different principle.

- + Which aspects of practice is your school extending and refining?
 - + What evidence do you have to show this?
- + Which aspects of practice is your school beginning to develop?
 - + What evidence do you have to show this?
- + Which aspects of practice does your school need to focus on next?
 - + What steps can you take and what support do you need?
- + Did different groups of people have different perspectives?
 - + What can you learn from these different perspectives?

The Golden Circle

Identify a particular aspect of practice that your school needs to focus on. Use a [golden circle template](#) and record the aspect of practice in the “what” ring, the outer ring of the circle. Ask the participants to consider and discuss their “why” for that particular aspect of practice before moving onto the “how”. Record ideas in the appropriate segments of the golden circle.

- + What is your “why” for this particular aspect of practice?
- + What happened when you considered your “why” for this aspect of practice?
- + How can you further embed this aspect of practice at your school?
- + Who is going to do what, and when?

Illustrate

Ask participants to draw a picture to illustrate the meaning or essence of each of the nine principles. Display the images.

- + How do the images add meaning to the principles?
- + Are there particular images that your school might want to use to help convey messaging about the MEF?

Display

Use the card set as a visual display in your school staffroom, office or classrooms. You might choose to display aspects of practice that you are currently focusing on or aspects of practice that you think you need to be reminded of on a daily basis.

Go further

Use the card set in different and innovative ways. We would love to hear how you have used the cards, and if you have anything else to add which would enrich the MEF, the card set and/or the user notes. Send an email with your ideas and any images to growwaitaha@gmail.com.

Principle headings

Print and cut out the headings to move around and use in different ways.

Vision

Perspectives and partnerships

Leadership of change

Collaborative approach to teaching and learning

Meaningful student involvement

Cultural sustainability

Authentic curriculum

Space and resources

Monitoring impact on well-being and learning

Progress indicators

Print and cut out the indicators to move around and use in different ways.

Beginning

Developing

Extending

Refining

Cards

There are nine different types of cards based on the 9 principles of the MEF:

1. Vision

Schools and their communities need a clear vision to guide ongoing transformation of education for their students.

2. Perspectives and partnerships

Schools need to be actively connected to their communities, sharing and benefiting from partnerships, expertise, and opportunities.

3. Leadership of change

Schools need to understand the complex processes of change and the key drivers for success.

4. Collaborative approach to teaching and learning

Outcomes for learning are optimised through the use of appropriate collaborative teaching and learning strategies.

5. Meaningful student involvement

For students to be at the centre of change, their participation and collaboration in learning design is critical.

6. Cultural sustainability

Schools need to embed culturally responsive pedagogy throughout the process of transformational change and local curriculum design.

7. Authentic curriculum

Curriculum, pedagogy and learning pathways should be developed, prototyped and implemented to ensure that ākonga experience an authentic curriculum.

8. Space and resources

Learning spaces and resources need to be responsive to ākonga needs and reflect the school's vision for teaching and learning.

9. Monitoring impact on well-being and learning

The impact of transformational change on learning and wellbeing needs to be continually monitored.

Print and cut out the cards in the following pages to move around and use in different ways.
